Thank you for selecting Valley Safety Services for your NRC or State required radioactive sealed source leak test.

We have enclosed a leak test kit and mailer for your use in performing and returning the test to us for analysis. When performing the leak test you should follow the instructions provided to you by your device manufacturer. Alternatively, we have enclosed leak testing instructions for you should you need them.

We can analyze your leak test the same day we receive it. If you need the results immediately please let us know in your response and we will email or fax it to you at no extra charge. Otherwise, we will mail you a report of the results in the next mail with a dated calibration label to affix to your device.

***Please provide a purchase order or check for \$41.00 for each kit/analysis returned to us. We accept MasterCard and Visa as well. However, we cannot furnish your test analysis results until we receive a form of payment.***

***\*\*There is no charge for the kit itself. If for any reason you do not need to use this leak test kit upon receipt, you may keep it for future use.***

We will keep your name in our file and send you another leak test kit 2 weeks before your next required test is due in 6 months. In this way we can assist you in continuing to meet this important regulatory safety requirement.

If we can be of further assistance to you, call or fax us at 413/323-9571 or visit our website at <http://www.vssa-inc.com>
